2 Years 1 Month of experience

PROFILE SUMMARY

DevOps-focused Full Stack Developer with 2+ years of experience in building, deploying, and maintaining scalable, production-ready web applications. Strong hands-on expertise in cloud infrastructure (AWS), CI/CD pipelines, Docker, Linux server management, and deployment automation, along with solid experience in the MERN stack (React, Node.js, Express, MongoDB). Experienced in designing RESTful APIs, implementing role-based authentication, subscription systems, and integrating secure payment gateways such as Stripe and Razorpay. Skilled in managing end-to-end application lifecycle — from development and containerization to production deployment and monitoring.
Passionate about building highly available, secure, and performance-optimized systems by combining modern DevOps practices with strong full-stack development capabilities.

WORK EXPERIENCE

Senior Software Engineer

Bridgeview Maritime
02-2025 - Present

- Led a team of 3 engineers to design, develop, and deploy a complex production-grade application
- Enhanced operational efficiency and productivity by implementing scalable and robust solutions
- Delivered the project on schedule, resulting in a X% increase in process optimization and resource utilizationby 20%. Implemented Agile and CI/CD-driven workflows, reducing release cycles and project delivery time by 30% through automation and streamlined sprint execution. Designed and optimized backend services and deployment

KEY SKILLS

Frontend Development
Backend Development | React.js
Expressjs | MongoDB | Node.js | Ci/Cd
AWS | Vps | Hosting | Deployment
Docker | Kubernetes | DevOps

PROJECTS

BuildProOgcs

5 Months

A scalable multi-portal marketplace platform with dedicated Buyer, Seller, and Admin interfaces, architected with a DevOps-first approach ensuring high availability, security, and performance optimization. Deployed and managed using cloud infrastructure, CI/CD pipelines, and production-grade Linux server environments.
The platform supports two seller models: “Sale by Seller” (direct buyer-seller contact sharing) and “Sale by OGCS” (company-managed checkout with Razorpay payment integration).
The Admin dashboard enables subscription management, transaction monitoring, seller approval workflows, analytics tracking, and operational control.
Responsible for infrastructure setup, deployment automation, server configuration, environment management, and production monitoring alongside full-stack development using MERN.

Growmax

2 Months

- Designed, developed, and deployed a dynamic institutional website delivering motivational content, construction training, and business development programs with a focus on scalable

processes, achieving a 15% improvement in system performance and reliability. Contributed to infrastructure setup, environment configuration, production deployments, and monitoring using DevOps best practices alongside full-stack development.

Software Engineer

ogcs pvt ltd
09-2024 - 02-2025

Led a team of 2 developers to successfully deliver 3 major production-grade software projects within tight deadlines, improving client satisfaction by 20% through efficient planning, automation, and streamlined deployments.
Implemented Agile methodologies integrated with CI/CD pipelines, reducing project delivery time by 30% and accelerating release cycles.
Contributed to infrastructure planning, deployment automation, and environment configuration to ensure stable and scalable production environments.
Coordinated sprint planning, code reviews, DevOps workflows, and release management to maintain high-quality standards and system reliability.

Software Engineer

Automation Artisans
06-2024 - 08-2024

- Developed and implemented new features in the company's software, resulting in a 20% increase in overall productivity.
- Collaborated with cross-functional teams to troubleshoot and resolve 15% more customerreported issues.
- Led a team of 5 developers in delivering a critical project ahead of schedule, exceeding client expectations.

INTERNSHIP

Knowx innovation technology
Weather forecast
3 Months

- Developed a weather forecasting model using data analysis and machine learning techniques, resulting in a 20% improvement in accuracy.

infrastructure and performance optimization.
- Implemented a secure and customizable Content Management System (CMS) enabling administrators to efficiently manage and update content.
- Built structured training program listings with streamlined user registration workflows and backend data handling.
- Integrated interactive multimedia features to enhance engagement during seminars and workshops.
- Managed deployment, server configuration, environment setup, and production monitoring using DevOps best practices alongside full-stack MERN development.

Bridgeviewships management system

5 Months

- Architected, developed, and deployed a scalable shipping and crewing management platform for Crew, Crewing Agents, Vessel Owners, and Admin, ensuring high availability and secure multi-role access.
- Implemented role-based authentication and structured data workflows enabling crew members to track contracts, sea service records, and sign-on/off details, improving operational transparency.
- Designed an optimized crew assignment system for Crewing Agents, enhancing workforce allocation efficiency and reducing manual coordination.
- Enabled Vessel Owners to manage fleets, onboard crew, and monitor vessel operations through centralized dashboards.
-Strengthened administrative control with automated contract approval workflows and comprehensive operations management tools.
- Managed production deployment, server configuration, CI/CD processes, and infrastructure optimization following DevOps best practices alongside full-stack MERN development.

Ornate maritime

2 Months

- Designed, developed, and deployed a scalable online training and certification platform for maritime professionals with secure, high-availability infrastructure.
- Implemented role-based access control using

- Collaborated with a cross-functional team to identify and implement process improvements, leading to a 15% reduction in project delivery time.
- Assisted in the collection and analysis of meteorological data to support the development of a comprehensive weather prediction system.

EDUCATION

B.Tech/B.E. - Computers

2023

Basavakalyan Engineering Collage Basavakalyan

Grade - 7.25/10

Class XII

2019

Karnataka, English

Marks - 60-64.9%

JWT authentication to ensure secure user management across Admin and student portals.
- Built course management, enrollment workflows, automated test submissions, and certificate generation modules.
- Integrated secure video streaming with controlled access to protect premium training content.
- Managed CI/CD pipelines, server configuration, environment management, and production deployments following DevOps best practices alongside MERN stack development.
